EDUCATION

Carnegie Mellon University

Master of Information Systems Management

Pittsburgh, PA

August 2024 - December 2025

Coursework: Generative AI Lab, Data Science for Product Managers, Distributed Systems, Cloud Security, Agile Methods, Applied ML

Manipal Institute of Technology

Udupi, India

Bachelor of Technology in Electrical and Electronics

July 2018 - July 2022

WORK EXPERIENCE

ConnectiveRx | AI Product Manager Intern, Pittsburgh - PA

May 2025 – Aug 2025

- Shipped a no-code AI agent with tool-calling and routing logic from design through deployment, defined content guardrails and orchestration flows for 300 users, cutting cycle time 60%
- Defined prompt versioning and validation gates across 10 repos, added output filtering and retry logic for LLM reliability, and wrote test automation cutting QA effort 55%
- Developed a PDF-to-React microsite pipeline in Python with Claude on Bedrock for 5 regulated deployments, iterating on partner onboarding with GTM teams and reducing build time 70%
- Prioritized AI Copilot use cases through user interviews and post-launch usage analytics, presented a data-driven roadmap to C-suite, and tracked adoption metrics driving org-wide rollout

Dolphin Ltd. | Associate Product Manager, Punjab - India

Jan 2023 – Jun 2024

- Owned demand planning roadmap with supply chain and finance leaders, setting reorder points and safety stock levels, improving forecast accuracy 25% and reducing stockouts
- Delivered self-serve Tableau dashboards with Python and SQL pipelines, defined KPIs for quarterly business reviews with leadership, improving data visibility 40%

Ganit Business Solutions | Data Analyst Intern, Chennai - India

Feb 2022 – Oct 2022

- Built a client-facing analytics platform in Django and SQL for 200+ retail stores, onboarded stakeholders to reporting workflows, cutting turnaround 80% and presenting results to executives

INDUSTRY CONSULTING (CMU)

Peak3 – Capstone Client Engagement, CMU | AI Product Engineer (Capstone), Pittsburgh - PA

Sep 2025 – Dec 2025

- Evaluated frontier and open-source LLMs on latency, reasoning depth, and token cost, defined eval rubrics for output quality, and shipped the model selection that cut turnaround 83%
- Prototyped a GenAI workflow from Python notebooks to a FastAPI production endpoint with prompt experiments and validation, shipping a self-serve tool that cut task creation from 20 min to under 1 min

AdSkate (Corporate Startup Lab, CMU) | Product Manager (Consultant), Pittsburgh - PA

Jan 2025 – Apr 2025

- Designed the analytics dashboard in React and TypeScript from 15 advertiser interviews and Figma iteration, replacing fragmented views with a unified experience that cut reporting friction"
- Drove an embeddings-based benchmarking feature with data science by running A/B experiments on cohort lift and iterating on UX with designers, lifting pilot engagement 40%

SKILLS

Technical: Python, TypeScript, React, SQL, Django, FastAPI, REST APIs, Docker, AWS, GCP, CI/CD, Git

AI & Tools: LLMs, RAG, Prompt Engineering, MCP, Agent Orchestration, LangChain, LangGraph, Eval Frameworks, Claude Code, Cursor

Product: 0-to-1 Development, User Discovery, A/B Testing, Rapid Prototyping, Usage Analytics, Roadmaps, PRDs

Design & Ops: Figma, PostHog, Tableau, OpenTelemetry, Jira, Confluence, Agile/Scrum

PROJECT

MemContext (Cerebral Valley x Anthropic Hackathon)

[Link](#)

Tech Stack: Python, FastAPI, TypeScript, MCP, SQLite, Sentence-Transformers, Playwright, Ollama, Claude Code

- Generalized the hackathon memory substrate into an MCP server with 5 tools serving provenance-backed claims across 3 composable predicate packs, deterministic supersession, browser observation, and hybrid retrieval

DriftEngine

[Link](#)

Tech Stack: Python, LangGraph, LangChain, MCP, FastAPI, React, shadcn/ui, SQLite, OpenTelemetry, Docker

- Engineered an MCP server that discovers process drift across Jira, GitHub, Drive, and Slack via 14 LangGraph agents, ranks findings by evidence strength, and routes fixes through human approval in a React dashboard

GroundTruth

[Link](#)

Tech Stack: Python, MCP, Prompt Engineering, TypeScript, LSP, SQLite, FTS5

- Open-sourced an MCP server that indexes codebases into a query able symbol graph via LSP with deterministic validation and impact tracing, lifting SWE-bench Verified by 2.4pp at half the cost
